ThunderForce IIITM

A century has passed since the hellish war between our Galaxy Union and the Empire of Lone broke out, and it has spread throughout almost half of the galaxy.

Our Galaxy Union finds itself in a precarious position as its armed forces are diminishing under the Empire's massive weapons. The Empire has also succeeded in hiding its planet by installing the HEXA-CLOAKING-SYSTEM on its main base and on its five major planets (HYDRA, GORGON, SEIREN, HAIDES and ELLIS). Therefore, in the Lone Star System, we can neither approach nor destroy anything from ordinary space. Also, the enemy has been using a great amount of RIS (Remote Intercepting System) called KILLPAROS, to surround their star system. Their RIS has never failed to destroy our attacking star fleet divisions. We are about to face the hardest mission we have ever experienced. Project Thunder Force III is our final challenge. The starfighter FIRE LEO 3, code name STYX is the key to victory. STYX has a small body that cannot be detected by the KILLPAROS, but still has the capability of carrying many types of the extremely potent weapons that the larger starfighters have.

STYX is now ready for the mission.

Screen Description

In the first box, the upper row shows the highest score since the Genesis System has been energized, while the lower row shows your current score. The middle box shows the weapons you have at your disposal; a red square indicating the weapon in use. If your game level is set to normal and you are destroyed, you will lose only the items that you have collected in that round. The last box shows the number of fighters you have left and your velocity potential, which can be changed by pressing the A, B or C-Button.

Game Over and Continue

The game is over when you lose all your jets during any one level. Press START before TIME turns to 0 to continue playing your credited games.

Game Ends

Your mission is completed when you successfully survive all five levels.
